To the Beacon Group Community:

The health and welfare of our Beacon Group community is a priority. We are closely monitoring the current public health concern related to the COVID-19 Coronavirus. According to the Arizona Department of Health Services, the current level of community COVID-19 spread is minimal. However, Beacon Group continues to take precautions to prevent the potential spread of COVID-19, the flu, other viruses, and the common cold, following best practices recommended by the Centers for Disease Control and Prevention: [Preventing COVID-19 Spread in Communities](#).

Currently, all our business services remain active as we keep Beacon Group's and our community's wellness a top priority. As more information related to COVID-19 becomes available, Beacon Group will communicate changes impacting our Beacon community and customers.

Thank you for your support and cooperation,

Greg Natvig
President/CEO
