Quarterly Service Delivery Performance Improvement Report

<u>Charles F. Tiller</u> Prepared By	<u>Center-Based Employment</u> Program	<u>First</u> Quarter	<u>2018-19</u> Year
---	---	---------------------------------------	--------------------------------------

Analysis of Program Objectives

During the first quarter of the current fiscal year, both the current index score (142.10) and the cumulative index score (142.10) were significantly above the overall Center-Based Employment program goal of 100. During the quarter, ten of the ten primary objectives were accomplished at or above established goal levels, while none were not. During the next quarter, emphasis needs to be placed in the following areas: continuing the same level of excellent performance.

Characteristics of Clients (Beginning of Services):

For those clients beginning services during the quarter, we served no clients at a higher percentage; while serving a lower percentage of clients having no prior work experience, clients receiving public assistant, clients having less than a high school degree or equivalent, clients under the age of 22, clients over the age of 55, and clients having a post-secondary education than we have traditionally served. From a disability standpoint for those clients beginning services during the quarter, we served a higher percentage of developmentally disabled and mentally ill clients; and a lower percentage of physically disabled, learning disabled, deaf/hard of hearing, blind/visually impaired, and traumatically brain injured clients than we have historically seen. In terms of client ethnicity characteristics for those clients beginning services during the quarter, we served a higher percentage of Hispanic and African American clients; and a lower percentage of Anglo, Native American, Asian/Pacific Islander, and clients of another ethnic background than we have in the past.

Characteristics of Clients (Receiving Services):

For those clients receiving services during the quarter, we served a higher percentage of clients receiving public assistance, and clients over the age of 55; while serving a lower percentage of clients under the age of 22 and clients having a post-secondary education than we have traditionally served. From a disability standpoint for those clients receiving services during the quarter, we served a higher percentage of developmentally disabled clients; and a lower percentage of physically disabled, mentally ill, learning disabled, deaf/hard of hearing, blind/visually impaired, and substance abuse clients than we have historically seen. In terms of client ethnicity characteristics for those clients receiving services during the quarter, we served a higher percentage of Hispanic, African American, Native American, and clients of another ethnic background; and a lower percentage of Anglo clients than we have in the past.

Characteristics of Clients (End of Services):

During the quarter, for those clients exiting services, we served a higher percentage of clients having no prior work experience, clients receiving public assistance, and clients over the age of 55; while serving a lower percentage of client having less than a high school degree or equivalent, clients under the age of 22, and clients having a post-secondary education, than we have traditionally served. From a disability standpoint for those clients exiting the program, we served a higher percentage of developmentally disabled clients and traumatically brain injured clients; and a lower percentage of physically disabled, mentally ill, learning disabled, deaf/hearing impaired, blind/visually impaired, and substance abuse clients than we have historically seen. In terms of client ethnicity characteristics for those clients exiting the program, we served a higher percentage of Hispanic and Asian/Pacific Islander clients; and a lower percentage of Anglo, African American, Native American, and clients of another ethnic background than we have in the past.

Performance Analysis

Action taken or changes made to improve performance during the quarter:

Discussions with staff members were conducted on a number of occasions regarding general outcomes improvement. In addition, after fourth quarter data was available for the previous fiscal year, a formal meeting was held with all appropriate Tucson Office staff members to review overall performance and to discuss specific actions to improve performance in the zero primary objectives that were being accomplished at below goal level. A similar meeting will be conducted as soon as first quarter data are finalized. That meeting is tentatively scheduled for Thursday, February 7th.

Areas needing performance improvements during the next quarter/extenuating or influencing factors:

No primary objectives were accomplished below established program goals during the quarter.

Quarterly action plan to improve performance:

Additional emphasis needs to be placed on ensuring that realistic vocational ISP goals are being established, that proper techniques are being implemented to achieve those goals, and that effective monitoring of progress is occurring.
